

# TAKING CARE OF YOUR EZ HALO EXTENSION

**Congratulations!** You have just purchased the finest quality **100% Human Hair Extensions**. A few simple precautions are necessary to ensure your extensions remain in the same excellent condition as when you purchased them.

## WASHING INSTRUCTIONS FOR YOUR EZ HALO EXTENSION

**EZ HALO Extensions** need only be washed every 15 to 20 times you wear them, as long as you have not slept with them on. Before washing, please brush your extensions, and make sure that all the clips are closed.

1. To wash your **EZ Halo Instant Extension** hold it firmly at the top, and wet the hair from top to bottom with a shower head. Always hold the hair suspended in its full length, never allowing it to fold over itself, as this may cause tangling. Apply shampoo directly on the hair and slide your fingers down the extension two or three times, from top to bottom, never from bottom to top. This avoids unnecessary tangling the extension hair..
2. Please use only the **Finest Professional Shampoos & Conditioners**, designed for **Dry Color Processed Hair**. **Do Not Leave the Rinse-out Conditioner in Your Hair for More than One Minute** & be sure to **Rinse Thoroughly** from top to bottom, leaving no conditioner residue in the hair.
3. After washing, please use a high intensity a **Leave-in De-tangling Conditioner**. This will ensure that the extension hair is well hydrated & always remains beautiful & healthy.
4. Please do not towel dry your extensions, simply slide your fingers tightly along the extension, from top to bottom, and then lay it down to dry on a fresh towel. Never lay your EZ Halo Extension to dry on towels which contain a fabric softener used in the dryer cycle such as "Bounce" sheets! The softening chemicals used in the dryer cycle sheets will be transferred from the towel, to the extension & will be reactivated by the blow dryer or flattening iron and damage the hair. Towels softened with a liquid fabric softener in the rinse cycle are fine, as the softening chemicals are rinsed out from the towels in the washing machine. It's always best however to avoid all fabric softeners in towels used on your hair extension.
5. It is always best to style the hair after it has almost completely dried. You may use any styling tools you desire, including blow dryers, curling or flat-irons, hot rollers...etc.
6. It is not recommended that you sleep with your extensions on, as that may shorten the longevity of your extensions. If you choose to sleep with your extensions, it's best to braid your hair or place your hair up in a bun. We do not recommended that you swim with your extension.

When you are not wearing your EZ Halo Extensions, please store the EZ halo in its original plastic bag. Before storing your extension, please make sure that the hair is dry, that all the clips are closed, and that the hair has been brushed. Storing your extension in a plastic bag ensures it does not gather dust, or lose its natural moisture. Please store the EZ Halo instant extension unfolded, in a dark place away from direct light.

You alone are responsible for ensuring the long lasting beauty and maintaining the quality hair of your hair extensions by taking the simple recommendations and precautions described to you in this leaflet.

The following products have been extensively tested and are highly recommended for your extensions:

**Schwarzkopf** : Shampoo: **BC Bonacure "Hair Therapy Moisture Kick"**

**Schwarzkopf** : Rinse out Conditioner: **BC Bonacure "Hair Therapy Repair Rescue Treatment"**  
Please leave in for 1 minute only, then rinse thoroughly for 2 to 3 minutes.

**Schwarzkopf** : Leave in Conditioner **BC Bonacure "Hair Therapy Repair Rescue Sealed Ends"**

Please be sure to use all three products every time you wash your extensions and to keep them healthy & beautiful.
